

July 23, 2020

Dear Chair :

Dear Members of
Columbia River Gorge Commission

Thank you for moving forward
with a Climate Action Plan for the gorge.
This is so needed if we are to
guide the future of National Scenic Area.

With the COVID limits Pocat residents
will rely on "staycations" and this added
to the national appeal of the Gorge will
increase its use.

We hope that you will have added to the
management plans: clear measures to
prevent urban sprawl, protect salmon
and other wildlife habitat and a focused
climate action plan which is so far
lacking.

Please do not delay any
longer and direct staff
to draft specific policies
& implementation measures.
