Subject: Management Plan comment

Message: I am grateful for the beautiful Columbia River Gorge National Scenic Area, and I urge the Gorge Commissioners to provide the strongest protections possible.

Please update the Management Plan to include a solid climate action plan, with specific measures that follow best available science. Please include protections for wildlife habitat, and prevent urban sprawl.

As you know, scenic resources can be degraded over time, due to cumulative and irreversible impacts from climate change.

Please act now to protect the Gorge for present and future generations.

Thank you.
