Land Use Application Cover Sheet

The Columbia River Gorge Commission has adopted a land use ordinance for the portions of Klickitat County within the National Scenic Area. This coversheet summarizes the relevant requirements of that ordinance for persons proposing new uses or developments. Your proposal must be approved before you can start your new use or development.

How the Development Process works:

When you submit a land use application to the Gorge Commission, it will be reviewed according to a process specified in the land use ordinance. There are two processes: Expedited Review and Review Use. The five basic steps are:

1. Completeness review
2. Notice preparation
3. Public comment period
4. Gather and analyze information
5. Prepare and issue decision

A pre-application meeting with a Gorge Commission planner can help you determine how your proposal will be reviewed and answer questions about what materials may be necessary for a complete application. The development review process generally begins when a completed land use application is received at the Commission Office. You may submit your application by mail or in person. Faxed applications cannot be accepted.

Step 1. Staff Completeness Review and Acceptance of Application

When an application is received at the Commission office, the Gorge Commission will conduct a completeness review of the application. In some cases, a planner may contact you to discuss your application. During this review, the planner will determine if the application has all the required information and whether there are any potential issues of concern. The planner may suggest minor modifications which may be necessary to meet some of the development guidelines or expedite the review process. The completeness review may take several weeks. The planner will also determine whether or not the application is eligible for Expedited Review.

Once the application is deemed complete, the formal review process begins.

Steps 2 and 3. Notice and Comment Period

After an application is accepted by the Gorge Commission, Commission staff will prepare a public notice of the application. The notice of your proposal will be mailed to:

1. The applicant and the property owner(s)
2. State and local government agencies,
3. The Indian tribal governments with treaty rights in the Gorge, and
4. Adjacent property owners, when applicable.
The notice will state the type of project, the location of the subject parcel, and the deadlines for public comment. Public comment will be accepted for 10 days for Expedited Review or 21 days for Review Use applications.

**Step 4. Analysis of Proposal**

Following the close of the comment period, an impact analysis of the proposal occurs. This will likely include an on-site evaluation. The Gorge Commission staff will determine if your proposal may adversely affect scenic, cultural, natural or recreation resources. If the Gorge Commission determines that there may be an adverse impact, you may need to modify the proposal or develop a mitigation plan. For example, development that impacts natural resources such as wildlife habitat or rare plants may require the applicant to develop a natural resources management plan.

To be approved through Expedited Review, the Gorge Commission must be able to determine that there will be no adverse impact according to the guidelines of Commission Rule 350-81-052. If an application cannot be approved through Expedited Review, the comment period will be extended and the application will continue via the Review Use procedures.

For Review Uses, any required cultural resources reconnaissance surveys will be forwarded to the Tribal Governments and the State Historic Preservation Office for review. Comments on a reconnaissance survey will be accepted for 30 days. At the close of this special comment period, the Gorge Commission will determine if it is necessary that you perform other steps to protect cultural resources. After all comment periods close, the Gorge Commission will gather and analyze other information about your proposal.

For all applications, your proposal will be approved only if it is found to be consistent with all of the ordinance guidelines. The Gorge Commission may set conditions of approval with a decision to ensure that the project satisfies the ordinance guidelines. The conditions of approval are legally binding requirements which must be followed during development.

**Step 5. Issuance of Decision**

When a decision is made, a copy of the decision will be mailed to you, the people who submitted comments on your proposal and other interested agencies. A petition to appeal the decision may be filed for 30 days after the decision date. A Gorge Commission planner will notify you if a petition is received. If no petition is filed, the decision is final.

Approvals from the Gorge Commission are valid for two years from the date the approval is granted. In some cases, an extension of the original approval may be granted for up to 12 months.

In addition to approval from the Gorge Commission, approvals or permits from county, state or federal agencies may be necessary. What other approvals or permits are required may depend on the type, size or location of the project. County officials can help you apply for the correct permits.

**II. Completing the Land Use Application**
In order for the Gorge Commission to review your proposal for consistency with the land use ordinances, it is necessary that you submit a land use application. Most applications will require four pieces of information: (1) a completed application form, (2) a project description and site plan with elevation drawings and landscape details, (3) a checklist of key viewing areas, and (4) a list of property owners within a specified distance of your property. Each of these requirements is described below.

More complicated projects may require additional information about the project and the surrounding area. A planner can help clarify whether your project will require additional information. Incomplete applications cannot be accepted for review. A planner will contact you if your application is not complete and inform you what additional information must be submitted to complete the application.

**Dwellings, Land Divisions, and Large Projects:**

In order to review your land use application for any type of dwelling, land division, or certain other large projects, the Gorge Commission requires documentation that your property is a separate and legally-created parcel.

The following proposals will require this documentation:

- All dwellings, including replacement dwellings, agricultural operator's relative, agricultural labor housing, family hardship mobile homes, and life estates;
- Accessory structures;
- Land divisions, including cluster developments and lot-line adjustments;
- Other uses, including, wineries, agricultural processing and packaging facilities, recreation, and mining.

**Documentation Needed:**

The documentation may be copies of a short plat recorded by the County, prior and current deeds, or a title report.

- Short Plat: If your property is a parcel created by a recorded short plat, submit a copy of the short plat map.
- Deeds: If your property was not created by a short plat, then you must submit the following deeds for your parcel and all adjacent parcels: (1) the deed showing the ownership on January 1, 1983, (2) the deed immediately prior to the deed showing the ownership on January 1, 1983, and (3) all deeds from the 1983 to the present. Alternatively, you may submit a title report from a title company that describes this deed history (be sure to have the title company include copies of the deeds in the title report).

You may obtain a copy of deeds or a short plat map from the Klickitat County Recorder's Office. If you need help identifying what documents to submit, a Gorge Commission planner will gladly help you.
Land Use Application

Applicant(s): STACEY D. BAKER  Property Owner(s): STACEY D. BAKER

Mailing Address: 14722 260th AVE. SE. Issaquah, WA 98027
Phone: 206-949-9791  Email: EBaker.Scragg@gmail.com

Mailing Address: 14722 260th AVE. SE. Issaquah, WA 98027
Phone: 206-949-9791  Email: EBaker.Scragg@gmail.com

Location of property:

Township: 3N  Range: 11E  Parcel address: 41 Windy Bluff Road
Section & Qtr. Section: NORTH  County: Klickitat
Tax Lot No(s): 03-15-33-0100-34/00  Parcel Size (acres): 5.10
Existing use of parcel: **PRIVATE RESIDENCE**

Use of adjacent parcels: **PRIVATE RESIDENCE**

**Project description:** This should include all proposed activities and details on size, height, exterior colors, and construction materials of proposed structures. Any areas of ground disturbance and landscaping details should also be described. It is important to describe all aspects of your project so that you may gain approval for all of the development activities you plan to do.
Application checklist: The following is required to complete your application:

- Application form completed and signed
- Site plan
- Key viewing areas checklist, elevation drawings, and landscape details, if required
- Names and addresses of adjacent property owners, if required
- Any additional information as required

Signature of the property owner(s) indicates that the property owner(s) is/are aware that an application is being made on the subject property. Signature of the property owner(s) also
authorizes the Gorge Commission or the Commission's designee(s) reasonable access to the site in order to evaluate the application.

Applicant(s) signature:

Site Plan

A plan drawn in black ink at a scale of 1 inch equals 200 feet (1:2400) or at a scale providing greater detail must be included with the application.
If the parcel is very large, you may show on the portion of the parcel affected by the proposed use. Be sure, however, to show enough of the parcel or some adjacent features, such as roads, so that the planners can orient themselves on your map. A small vicinity map showing the subject parcel and surrounding parcels may help.

At a minimum, you must show the following features; other site plan information may be required depending on the type or location of development being proposed.

- applicant(s) name
- location and width of existing and proposed roads, driveways, and trails
- scale and north arrow
- location and size of all existing and proposed structures
- boundaries of parcel with dimensions and size
- location of existing and proposed services including wells or other water supplies, sewage disposal systems, power and telephone poles and lines and outdoor lighting
- significant terrain features or landforms
- location and depth of all proposed grading and ditching
- groupings and species of trees or other vegetation on the parcel
- location and species of vegetation that would be removed or planted
- bodies of water and water courses
Key Viewing Areas:

Key viewing areas are important public viewpoints and areas that afford opportunities to view the Gorge scenery. Key viewing areas are listed below.

Please check those sites which can be seen from your property:

✔ Historic Columbia River Highway
☐ Old Highway 8 (County Road 1230)
✔ Highway I-84
☐ Washington State Route 142
☐ Washington State Route 14
☐ Washington State Route 141
☐ Panorama Point Park
✔ Columbia River
☐ Rowena Plateau and Nature Conservancy Viewpoint
☐ Cook-Underwood Road

If your project would be visible from one or more key viewing areas, then you must submit elevation drawings and landscaping details.

**Elevation drawings** must show the sides of proposed buildings which would be visible from key viewing areas, including:

- the appearance of proposed buildings over 400 square feet in size
- surrounding final grades

**Landscape details** must show how your project will be screened from key viewing areas, including:

- location of plants used
- number of plants
- size of plants
- type of plants
- irrigation provisions or other measures to ensure the survival of landscaping planted for screening purposes
- location of existing and proposed topographical features which would screen your project.
Adjacent Property Owners:

If your project is included in one of the categories below, then you must submit names and address of adjacent property owners within a specified distance (200 feet or 500 feet) of the perimeter of your parcel. The following list specifies the distance within which property owners must be notified of your proposal. You only need to provide the names and address (along with the parcel number); the Commission will send the notice.

Your county Assessor's Office can assist you in obtaining this property owner information. You may use the back of this form to record the names and addresses or you may submit forms which the county may provide you.

Notification of landowners within 200 feet:

- Uses within Residential designation (except single-family dwellings located adjacent to Agriculture or Forest designations - see notification of landowners within 500 feet)
- Uses within Agriculture designation (except non-farm single-family dwellings in Large-Scale Agriculture designation - see notification of landowners within 500 feet)
- Uses within Forest designation (except utility facilities, railroads, home occupations, cottage industries, wineries, agriculture product processing and packaging, mineral resources, geothermal resources, aquaculture, boarding of horses, temporary asphalt/batch plants, expansion of non-profit camps-retreats-conference centers, bed and breakfasts, and non-profit learning/research facilities - see notification of landowners within 500 feet)
- Uses within Commercial designations
- Uses within Recreation designations
- Uses within Open Space designations
- Uses within Agriculture-Special designations
- Uses within Special Management Areas

Notification of landowners within 500 feet:

- Single-family dwellings within Residential designation located adjacent to Agriculture or Forest designations
- Non-farm single-family dwellings within Large-Scale Agriculture designation
- Utility facilities, railroad, home occupations, wineries, agriculture product processing and packaging, mineral resources, geothermal resources, aquaculture, boarding of horses, temporary asphalt/batch plants, expansion of non-profit camps-retreats-conference centers, and bed and breakfasts, non-profit learning/research facilities within Forest designations

Projects Requiring Grading Plans:
If your project meets one of the following, then you must submit a grading plan:

In the General Management Area:
- applications for structural development involving more than 100 total cubic yards of grading (material excavated and/or used as fill) with slopes of more than 10%;
- applications for structural development involving more than 200 total cubic yards of grading (material excavated and/or used as fill) where the building site is visible from one or more Key Viewing Areas

In the Special Management Area:
- applications for structural development involving more than 100 total cubic yards of grading (material excavated and/or used as fill) with slopes of more than 10% (except trails)

The grading plan must include the following:

- A map of the site prepared at a scale of 1 inch equals 200, feet (1:2;400) or at a scale providing greater detail, with contour intervals of at least every five feet including:
  - Existing and proposed final grades
  - Location of all areas to be graded, with cut banks and fill slopes delineated; and,
  - Estimated dimensions of graded areas.

- A narrative description of the proposed grading activity, including:
  - Its purpose
  - An estimate of the total volume of material to be moved
  - The height of all cut banks and fill slopes
  - Provisions to be used for compaction, drainage, and stabilization of graded areas (preparation of this information by a licensed engineer of geologist is recommended)
  - A description of all plant materials used to revegetate exposed slopes and banks, including types of species, number of, size and location of plants, and a
description of irrigation provisions or other measures necessary to ensure the survival of plantings; and

- A description of any interim or permanent erosion control measures to be utilized.

Please note: Structural development on slopes greater than 30% is prohibited.

*Please use this template or attach a separate Grading Plan:

Grading Plan:
General Structural Notes:

1. All work to meet the requirements of the Building Code as adopted and administered by the city, county and state in which site is located.
2. MDC assumes no responsibility for changes or departures from these drawings unless notified in writing prior to start of construction.
3. Owner/Builder shall verify all dimensions in the field and notify MDC of any discrepancies. Written dimension take precedence over scaled.
4. Any changes to these plans must be approved in writing prior to start of construction.
5. Approved plans shall be accompanied by the plan review in order to be valid prior to commencement of work.
6. Building Permit must be posted in visible location prior to any construction could result in rescheduling delays and added fees.
7. Sect 307 (a.) of the uniform building code prohibits occupancy of this building prior to completion of final inspection.
8. Owner/Builder shall verify all dimensions in the field and notify MDC of any discrepancies. Written dimension take precedence over scaled.

1. All work to meet the requirements of the Building Codes as adopted and administered by the city, county and state in which site is located. Drawings may not represent actual final contours.
2. Flat roofs - Dormers are to have provision for air venting and must be pitched at least 3/4" per foot. Soffits must be a minimum of 6" wide. No appliance venting under windows or within 3' of soffit. Custom Tiled showers require cementboard backing in place of drywall.
3. Porches/Decks: 40 sf
4. 1/2" plywood nailed to underside of trusses at the ceiling with similar diaphragm nailing. Custom Shower area requires custom shower frame made in place of trusses. Railing height must be 36" with not more than 4" openings.
5. All joists may be offset up to 4" to accommodate plumbing. Roofs to be 5/8" CDX under roofing material, designed to act as a parapet. See Engineering for walls over 10'. All posts & beams shall have recommended manufactured connectors (Simpson) to be used. Beam pockets oversize by 1/2" on 3 sides. Foundation drainage and separate rainwater (roof) disposal system required.
6. Frost = 18". Chimneys must extend 2' higher than any horizontal plane within 10', Septic systems must be a minimum of 100' from boundary. Dryer and exhaust fan vent to outside and not to exceed 15' in length.
7. Driveway: 2500 f?c Standards. (R402.2 Concrete shall have a minimum specified compressive strength of 349'.
8. Structure: 1260 1255 1260 1260
