CASE FILE: C21-0005

PROPOSAL: The Columbia River Gorge Commission has received an application for upgrades to an existing communications facility including removing and replacing three existing antennas and three RRHs and associated electrical and mounting equipment.

APPLICANT: Leah Stout (c/o AT&T)

LANDOWNER: Wendy Hall

LOCATION: The subject property is located atop Haystack Butte in the SE ¼ of Section 3, Township 2 North, Range 15 East, Willamette Meridian, Klickitat County, Washington. Tax Lot Number 02-15-0300-008/00. The tax lot is .92 acres in size and part of a larger 71.40-acre parcel (Tax Lot Number 02-15-03-0000-06/00).

LAND USE DESIGNATION: General Management Area (GMA) – Large-Scale Agriculture (160)

DECISION: Based upon the following findings of fact, the land use application by Wendy Hall, for for upgrades to an existing communications facility is consistent with the standards of Section 6 and the purposes of the Columbia River Gorge National Scenic Area Act, P.L. 99-663, the Management Plan for the Columbia River Gorge National Scenic Area (Management Plan), and approvable under Commission Rule 350-81, and is hereby APPROVED.

CONDITIONS OF APPROVAL:
The following conditions of approval are given to ensure that the subject request is consistent with the standards of Section 6 and the purposes of P.L. 99-663, and the Management Plan and approvable under Commission Rule 350-81. Compliance with them is required. This decision must be recorded in county deeds and records to ensure notice of the conditions to all successors in interest (Management Plan, Review Uses Guideline 1, pg. II-96).

1. To ensure notice of the conditions to successors in interest, this Director’s Decision, Staff Report for C21-0005, and approved site plan shall be recorded in county deeds and records at the Klickitat County Auditor’s Office. Once recorded, the applicants shall submit a copy of the recorded documents to the Executive Director.

2. This decision does not exempt the proposal from other non-National Scenic Area rules and regulations. It is the applicant’s responsibility to ensure the use complies with all other applicable federal, state, and county laws and to obtain necessary approvals, including utility easement approvals.

3. Any new land uses or structural development such as alterations or grading not included in the approved application or site plan will require a new application and review.
4. The developments shall be constructed as shown on the approved project description, site plan and elevation drawings. Any changes shall be reviewed and approved by the Executive Director before the changes are implemented.

5. The proposed antennas and elements of the proposal located twenty feet above ground level — antennas, RRHS, breakers, DC Cables, DC9 Squid, steel pipes and pipe mounts FXPC — are required to be matte grey or matte off-white and have finishes with low reflectivity. Any changes to the colors must first be submitted to the Executive Director for review and approval before installation.

6. All exterior materials shall be nonreflective or have low reflectivity. The metal framing shall be painted with matte paint and maintained as necessary to ensure that the material is nonreflective with no bare aluminum framing or bare structural surfaces.

7. All outdoor lighting shall be directed downward and sited, hooded and shielded so that the light is not highly visible from Key Viewing Areas. Shielding and hooding materials shall be composed of non-reflective, opaque materials.

9. If cultural resources are discovered during construction activities, all activities within 100 feet of the cultural resources shall immediately cease and the applicants shall notify the Gorge Commission within 24 hours of discovery and the State Physical Anthropologist, Dr. Guy Tasa at (360) 586-3534 or guy.tasa@dahp.wa.gov. The cultural resources shall remain as found and further disturbance is prohibited until permission is granted by the Executive Director of the Gorge Commission.

10. If human remains are discovered during construction activities, all activities shall cease immediately upon their discovery. Local law enforcement, the Executive Director and Indian Tribal governments shall be contacted immediately. Further disturbance is prohibited until permission is granted by the Executive Director of the Gorge Commission.

11. The applicant shall notify the Gorge Commission within 30 days of project completion to arrange for a FINAL INSPECTION to confirm compliance with all of the conditions of approval. Project completion means completion of all work to the exteriors of structures (including painting). The applicants shall arrange the inspection by calling the Gorge Commission at (509) 493-3323 or info@gorgecommission.org. Each inspection may take up to seven business days from the time of calling for the inspection.

DATED AND SIGNED THIS 24th day of June 2021 at White Salmon, Washington.

[Signature]
Krystyna U. Wolniakowski
Executive Director

EXPIRATION OF APPROVAL:
Commission Rule 350-81-044 governs the expiration of this Director’s Decision.

This decision of the Executive Director becomes void on the 24th day of June 2023 unless construction has commenced in accordance with Commission Rule 350-81-044(4).
Commission Rule 350-81-044(4) specifies that commencement of construction means actual construction of the foundation or frame of the approved structure.

Construction must be completed within two years of the date that the applicant commenced construction. The date of the Executive Director's preconstruction inspection to confirm the location of proposed structural development as required by this decision shall be considered the date the applicant commenced construction, unless the applicant demonstrates otherwise.

Once the applicant has commenced construction of one element in this decision, the applicant will need to complete all elements in this decision in accordance with Commission Rule 350-81-044. The Commission does not use different "commencement of construction" dates for different elements in this decision.

The applicant may request one 12-month extension of the time period to commence construction and one 12-month extension to complete construction in accordance with Commission Rule 350-81-044(6). The applicant must submit the request in writing prior to the expiration of the approval. If the applicant requests an extension of time to complete construction after commencing construction, the applicants shall specify the date construction commenced. The Executive Director may grant an extension upon determining that conditions, for which the applicants were not responsible, would prevent the applicants from commencing or completing the proposed development within the applicable time limitation. The Executive Director shall not grant an extension if the site characteristics and/or new information indicate that the proposed use may adversely affect the scenic, cultural, natural or recreation resources in the National Scenic Area.

**APPEAL PROCESS:**

*The appeal period ends on the 24th day of July 2021.*

The decision of the Executive Director is final unless the applicant or any other person who submitted comment files a Notice of Intent to Appeal and Petition with the Commission within thirty (30) days of the date of this decision. Information on the appeal process is available at the Commission office.

**NOTES:**

Any new land uses or structural development such as driveways, parking areas, garages, workshops, fences or other accessory structures; or additions or alterations not included in the approved application or site plan will require a new application and review. New cultivation also requires a new application and review.

This decision does not address local, state, or federal requirements that may be applicable to the proposed development. The landowner is responsible for obtaining all applicable county, state, or federal permits required for the development.

GENERAL NOTES

1. GENERAL REQUIREMENTS

   a. Potable Water Source

   The water supply is to be fully developed and be of sufficient capacity to meet the total water demands, including any anticipated increase in the number of employees, for the duration of the project. The water source shall be identified in the Contract Documents.

   b. Site Utilities

   Site utilities shall include utilities such as water, sewer, electricity, and natural gas. The availability of utilities shall be confirmed by the owner prior to the issuance of the Contract Documents.

   c. Site Safety

   The site shall be kept clean and safe at all times. All materials and equipment shall be stored in a safe and secure manner. The site shall be cleaned up daily and at the end of the project.

   d. Site Access

   Access to the site shall be controlled to prevent unauthorized access. All vehicles shall be equipped with appropriate safety equipment.

   e. Site Security

   Security shall be provided at the site to prevent theft and vandalism. Adequate lighting shall be provided.

   f. Site Egress

   An egress plan shall be provided to ensure that all personnel can safely exit the site in case of an emergency.

   g. Site Maintenance

   The site shall be maintained in a clean and orderly condition throughout the project. All waste materials shall be removed from the site in a timely manner.

   h. Site Documents

   All changes to the site shall be documented in the site documents. The site documents shall be kept up-to-date and accessible to all personnel.

   i. Site Records

   All records related to the site, including site documents, shall be kept for a minimum of five years.

   j. Site Insurance

   All personnel working on the site shall be required to carry appropriate insurance.

   k. Site Safety

   All personnel working on the site shall be required to comply with all applicable safety regulations.

   l. Site Containment

   All materials and equipment shall be contained within the site to prevent contamination of the surrounding environment.

   m. Site Signage

   Appropriate signage shall be provided to inform all personnel of potential hazards and safety precautions.

   n. Site Training

   All personnel working on the site shall receive appropriate training on site safety and procedures.

   o. Site Communication

   An effective communication plan shall be established to ensure that all personnel are informed of important project-related information.

   p. Site Monitoring

   The site shall be monitored for compliance with all applicable regulations and standards.

   q. Site Post-Closure

   The site shall be restored to its original condition following project completion.

   r. Site Closure

   The site shall be closed and all debris removed in a timely manner.

   s. Site Cleanup

   All materials and equipment shall be removed from the site in a timely manner.

2. CONTRACTOR'S RESPONSIBILITY

   a. Contractor's Responsibility

   The contractor shall be responsible for all work performed on the project.

   b. Contractor's Responsibility for Temporary Work

   The contractor shall be responsible for all temporary work performed on the site.

   c. Contractor's Responsibility for Site Maintenance

   The contractor shall be responsible for maintaining the site in a clean and orderly condition.

   d. Contractor's Responsibility for Site Security

   The contractor shall be responsible for ensuring the security of the site.

   e. Contractor's Responsibility for Site Egress

   The contractor shall be responsible for ensuring that all personnel can safely exit the site in case of an emergency.

   f. Contractor's Responsibility for Site Containment

   The contractor shall be responsible for containing all materials and equipment on the site.

   g. Contractor's Responsibility for Site Signage

   The contractor shall be responsible for providing appropriate signage on the site.

   h. Contractor's Responsibility for Site Training

   The contractor shall be responsible for providing site training to all personnel.

   i. Contractor's Responsibility for Site Communication

   The contractor shall be responsible for establishing an effective communication plan on the site.

   j. Contractor's Responsibility for Site Monitoring

   The contractor shall be responsible for monitoring the site for compliance with all applicable regulations and standards.

   k. Contractor's Responsibility for Site Post-Closure

   The contractor shall be responsible for restoring the site to its original condition following project completion.

   l. Contractor's Responsibility for Site Closure

   The contractor shall be responsible for closing the site and removing all debris in a timely manner.

   m. Contractor's Responsibility for Site Cleanup

   The contractor shall be responsible for removing all materials and equipment from the site in a timely manner.

   n. Contractor's Responsibility for Site Insurance

   The contractor shall be responsible for obtaining appropriate insurance on the site.

   o. Contractor's Responsibility for Site Safety

   The contractor shall be responsible for ensuring the safety of all personnel on the site.

   p. Contractor's Responsibility for Site Closure

   The contractor shall be responsible for ensuring that all site closure requirements are met.

3. SITE CONDITIONS

   a. Site Conditions

   The site conditions shall be described in the Contract Documents.

   b. Site Conditions for Temporary Work

   The site conditions for temporary work shall be described in the Contract Documents.

   c. Site Conditions for Site Maintenance

   The site conditions for site maintenance shall be described in the Contract Documents.

   d. Site Conditions for Site Security

   The site conditions for site security shall be described in the Contract Documents.

   e. Site Conditions for Site Egress

   The site conditions for site egress shall be described in the Contract Documents.

   f. Site Conditions for Site Containment

   The site conditions for site containment shall be described in the Contract Documents.

   g. Site Conditions for Site Signage

   The site conditions for site signage shall be described in the Contract Documents.

   h. Site Conditions for Site Training

   The site conditions for site training shall be described in the Contract Documents.

   i. Site Conditions for Site Communication

   The site conditions for site communication shall be described in the Contract Documents.

   j. Site Conditions for Site Monitoring

   The site conditions for site monitoring shall be described in the Contract Documents.

   k. Site Conditions for Site Post-Closure

   The site conditions for site post-closure shall be described in the Contract Documents.

   l. Site Conditions for Site Closure

   The site conditions for site closure shall be described in the Contract Documents.

4. GENERAL NOTES

   a. General Notes

   The general notes shall provide additional guidance and requirements for the project.

   b. General Notes for Temporary Work

   The general notes for temporary work shall provide additional guidance and requirements for temporary work on the site.

   c. General Notes for Site Maintenance

   The general notes for site maintenance shall provide additional guidance and requirements for site maintenance on the site.

   d. General Notes for Site Security

   The general notes for site security shall provide additional guidance and requirements for site security on the site.

   e. General Notes for Site Egress

   The general notes for site egress shall provide additional guidance and requirements for site egress on the site.

   f. General Notes for Site Containment

   The general notes for site containment shall provide additional guidance and requirements for site containment on the site.

   g. General Notes for Site Signage

   The general notes for site signage shall provide additional guidance and requirements for site signage on the site.

   h. General Notes for Site Training

   The general notes for site training shall provide additional guidance and requirements for site training on the site.

   i. General Notes for Site Communication

   The general notes for site communication shall provide additional guidance and requirements for site communication on the site.

   j. General Notes for Site Monitoring

   The general notes for site monitoring shall provide additional guidance and requirements for site monitoring on the site.

   k. General Notes for Site Post-Closure

   The general notes for site post-closure shall provide additional guidance and requirements for site post-closure on the site.

   l. General Notes for Site Closure

   The general notes for site closure shall provide additional guidance and requirements for site closure on the site.

MOUNT REINFORCEMENT DETAIL

SHEET No. A-9
CASE FILE: C21-0005

PROPOSAL: The Columbia River Gorge Commission has received an application for upgrades to an existing communications facility including removing and replacing three existing antennas and three RRHs and associated electrical and mounting equipment.

APPLICANT: Leah Stout (c/o AT&T)

LANDOWNER: Wendy Hall

LOCATION: The subject property is located atop Haystack Butte in the SE ¼ of Section 3, Township 2 North, Range 15 East, Willamette Meridian, Klickitat County, Washington. Tax Lot Number 02-15-0300-008/00. The tax lot is .92 acres in size and part of a larger 71.40-acre parcel (Tax Lot Number 02-15-03-0000-06/00).

LAND USE DESIGNATION: General Management Area (GMA) – Large-Scale Agriculture (160)

COMMENTS FROM INDIVIDUALS/AGENCIES/GOVERNMENTS:

Notice of the subject request was mailed to property owners within 200 feet of the subject parcel and the following organizations/agencies/governments:

- Confederated Tribes and Bands of the Yakama Nation
- Confederated Tribes of the Umatilla Indian Reservation
- Confederated Tribes of Warm Springs Reservation of Oregon
- Nez Perce Tribe
- U.S. Forest Service National Scenic Area Office (USFS NSA)
- Washington Department of Archaeology and Historic Preservation
- Klickitat County Planning Department
- Klickitat County Building Department
- Klickitat County Public Works Department
- Klickitat County Health Department
- Klickitat County Assessor
- Skamania County
- Washington Natural Heritage Program
- Washington Department of Fish and Wildlife (WDFW)
- Friends of the Columbia Gorge

Written comments were received from:

- Steve McCoy, Staff Attorney, Friends of the Columbia Gorge
- Chris Donnermeyer, Heritage Resource Program manager, USFS NSA
FINDINGS OF FACT:

A. LAND USE

1. Leah Stout, working on behalf of AT&T, has applied for modifications to an existing aboveground overhead utility facility including removing and replacing three existing antennas and three RRHs and associated electrical and mounting equipment.

2. The project adds to an existing telecommunication facility on Haystack Butte, northeast of Wishram, WA. The existing facility is located on a .92-acre tax lot, part of a larger 71.40-acre parcel, and designated Large-Scale Agriculture in the GMA. Haystack Butter is one of two significant locations for communication facilities in Klickitat County. (The other, known as Stacker Butte, is located northeast of Dallesport, Washington.) With steep Gorge walls and river valleys, the Gorge contains difficult terrain to effectively relay communication signals. Because of their topographic gain above the Columbia River Gorge, many facilities are located at one of these two sites.

   New antennas and associated support structures necessary for public service on existing wireless communication poles and towers other than those allowed outright, provided the size is the minimum necessary to provide the service.

The existing facility was built in 1998 (see Director’s Decision C98-0023-K-G-21). Modifications were made to the facility in Director’s Decision’s C16-0004. The antennas proposed for the tower measure 96.5” x 27.2” x 7.7” and are comparable to the dimensions to the antennas they replace which currently measure 72.5” x 12” x 9” while providing increased network capacity to meet user demand necessary to provide service. The RRH units proposed for the tower measure 28.7” x 15.3” x 9.4” and are comparable to the dimensions to the RRH units they replace. The new antennas are taller in height but are narrower than the existing antennas. The new antenna model supports LTE 4C technology which is not currently offered in the area and without installing this new antenna model, service provided will suffer. The proposed development to modify an existing overhead facility and add three new antennas is eligible for expedited review, consistent with Commission Rule 350-81-050(1)(r)(C).

CONCLUSION:

The proposed development is an allowed expedited review use, subject to compliance with the guidelines in Commission Rule 350-81-052 that protect scenic, cultural, natural and recreation resource treaty rights.

B. SCENIC RESOURCES

1. Commission Rule 350-81-052(1)(a)(B) states:

   Except signs, the colors of structures topographically visible from key viewing areas shall be dark earth-tones found at the specific site or the surrounding landscape. The specific colors or list of acceptable colors shall be included as a condition of approval. This guideline shall not apply to additions, which may match the color of existing buildings.
The development site is located on Haystack Butte at an approximate elevation of 2,925 feet. The tower on the site is visible in the middle ground (1 to 3 miles) and background (greater than three miles) from several Key Viewing Areas (KVAs) to the south including SR 14, the Columbia River, and I-84, all of which are located at lower elevations. The site is set back from the bluff, and as viewed from KVAs, the crest of the hillside provides topographic screening for approximately the bottom twenty feet of the tower and communications shelters. The surrounding landscape for this project is the sky. In similar previous Development Reviews, the Commission found light grey earth-tone color antennas are visually subordinate because they blend into the lighter colored sky. The proposed antennas and RRHs and elements of the proposal located higher than twenty feet above ground level - antennas, RRHS, breakers, DC Cables, DC9 Squid, steel pipes and pipe mounts- are required to be matte grey or matte off-white. As proposed by the applicant, the development request is consistent with Commission Rule 350-81-052(1)(a)(B).

2. Commission Rule 350-81-052(1)(a)(C) states:

   Except signs, structures topographically visible from key viewing areas shall use low or non-reflective building materials, including roofing, gutters, vents and chimneys.

   A condition of approval is included in the Director’s Decision to require a flat, low reflective finish consistent with Commission Rule 350-81-052(1)(a)(C).

3. Commission Rule 350-81-052(1)(a)(D) states:

   Outdoor lights shall be directed downward and sited, hooded, and shielded such that they are not highly visible from key viewing areas. Shielding and hooding materials shall be composed of non-reflective, opaque materials.

   No outdoor lights are proposed. No lighting is proposed as part of the application. However, a condition of approval is included in the decision to notify the applicant that exterior lighting requires review and approval by the Gorge Commission.

   Structures within one-half mile of a key viewing area and topographically visible from the key viewing area shall be sited, screened and/or designed to achieve the applicable scenic standard (e.g., visual subordinance, not visually evident).

   The proposed development is located northeast of Wishram, Washington, over a mile north of State Route 14. It is not located within one-half mile of any Key Viewing Area. Given this information, Commission Rule 350-81-052(1)(a)(F) is not applicable.

CONCLUSION:

The proposed development is consistent with the expedited review guidelines for scenic resources in Commission Rule 350-81-052.

C. CULTURAL RESOURCES

1. Commission Rule 350-81-052(1)(b) includes cultural resource protection provisions for uses eligible for the expedited review process. It states:
(A) The expedited development review process shall only be used to review proposed development that does not require a reconnaissance survey, pursuant to 350-81-54(1)(c)(A) or historic survey, pursuant to 350-81-540(1)(c)(B).

(B) The GMA guidelines that protect cultural resources and human remains discovered during construction [350-81-540(6) and (7)] shall be applied as conditions of approval for all development approved under the expedited development review process.

Chris Donnermeyer, Heritage Resources Program Manager for the Columbia River Gorge National Scenic Area, provided a cultural resources survey determination for the proposed development on May 7, 2021. Mr. Donnermeyer determined that the proposed development does not require a reconnaissance survey or historic survey pursuant to Commission Rules 350-81-540(1)(c)(A) and (B) because (1) proposed use would involve the modification, expansion, replacement, or reconstruction of existing buildings and structures, (2) would occur on a site that has been adequately surveyed in the past, (3) would not alter the exterior architectural appearance of significant buildings and structures that are 50 years old or older, and (4) would not compromise features of the surrounding area that are important in defining the historic or architectural character of significant buildings or structures that are 50 years old or older. With conditions of approval to require the protection of cultural resources and human remains discovered during construction, the proposed development is consistent with the cultural resource protection guidelines in Commission Rule 350-81-052(1)(b).

CONCLUSION:

With conditions to protect unknown cultural resources or human remains discovered during construction, the proposed development is consistent with the cultural resource guidelines for expedited review in Commission Rule 350-81-052(1)(B).

D. NATURAL RESOURCES

1. Commission Rule 350-81-052(1)(d) lists natural resource protection guidelines for expedited review uses. To qualify for the expedited review process, Commission Rule 350-81-052(1)(d)(A)(i) requires new development is located outside buffer zones for wetlands, streams, rivers, ponds, and lakes, except for lot line adjustments or development located inside road, utility or railroad rights-of-way or easements that have been previously disturbed and regularly maintained.

There are no wetlands on the site. According to the Gorge Commission’s resource inventories, the closest wetlands are located over 3,000 feet away from the project site. Intermittent streams originate below the elevation of the communication site, approximately 2,000 feet from the communication site. Pursuant to Commission Rule 350-81-570(7), intermittent streams have 50-foot buffers. The proposed development is located more than 50 feet from the ordinary high-water mark of any stream, and outside of the buffer zones. The tower modifications would not be located within the vicinity of any wetlands, rivers, ponds, or lakes.

Additionally, the development is located within a fenced area that has been used and maintained as a telecommunications site. As such, the site has been previously disturbed and regularly maintained.

The proposed development is consistent with 350-81-052(1)(d)(A)(i).
2. Commission Rule 350-81-052(1)(d)(B) contains expedited review guidelines to protect sensitive wildlife and sensitive plants. It requires eligible development to meet one of the following circumstances:

(I) The development is at least 1,000 feet from known sensitive wildlife areas or sites (excluding sensitive aquatic species, deer winter range, and turkey habitat) and known sensitive plants; or

(II) The development does not disturb the ground or is inside road, utility or railroad rights-of-way or easements or other areas that have been previously disturbed and regularly maintained; or

(III) For sensitive wildlife, the development is within 1,000 feet of known sensitive wildlife areas or sites (excluding sensitive aquatic species, deer winter range and turkey habitat), but an appropriate federal or state wildlife agency determines (1) the sensitive wildlife area or site is not active or (2) the proposed development would not compromise the integrity of the wildlife area or site or occur during the time of the year when wildlife species are sensitive to disturbance.

For sensitive plants, the development is within 1,000 feet of known sensitive plants, but the Oregon or Washington Natural Heritage Program or a person with recognized expertise in botany or plant ecology hired by the applicant has determined that the development would be at least 200 feet from the sensitive plants.

According to the Gorge Commission’s resource inventories, there are no known sensitive plants or wildlife areas or sites within 1,000 feet. Additionally, the development is located within a fenced area that has been used and maintained as a telecommunications site. As such, the site has been previously disturbed and regularly maintained.

The proposed addition is consistent with the natural resource protection measures in Commission Rule 350-81-052(1)(d)(B)(I) and (II).

CONCLUSION:

As proposed, the development is consistent with the natural resource protection guidelines for expedited review in Commission Rules 350-81-052(1)(d)(B)(I) and (II).

E. RECREATION RESOURCES

1. Commission Rule 350-81-052(1)(c)(A) requires new development approved under the expedited review process to not detract from the use and enjoyment of recreation sites on adjacent parcels.

The parcel is designated Recreation Class 1 according to the Gorge Commission's Recreation Intensity Class Map. No established recreation sites exist on adjacent properties; therefore, this rule is no applicable.

CONCLUSION:

The proposed development is consistent with the recreation resource guidelines for expedited review in Commission Rule 350-81-086.
F. TREATY RIGHTS PROTECTION

1. Commission Rule 350-81-052(2) requires developments reviewed using the expedited review process to comply with the following treaty rights protection guidelines.

   (a) Proposed developments shall not affect or modify any treaty or other rights of any Indian tribe.

   (b) The expedited development review process shall cease and the proposed developments shall be reviewed using the full development review process if an Indian tribe submits substantive written comments during the comment period that identify the treaty rights that exist in the project vicinity and explain how they would be affected or modified by the proposed development.

No substantive comments identifying treaty rights or concerns were received from Indian tribes during the comment period. The site is located over one and half miles from the Columbia River and does not affect treaty fishing or fishing practices. The project also does not affect any first foods, or traditional foods, located in the vicinity. Given this information, the development does not affect or modify any treaty or other rights of any Indian tribe. Given this information, the proposed addition is consistent with Commission Rule 350-81-052(2).

CONCLUSION:

The proposed development is consistent with the treaty rights protection guidelines for expedited review uses in Commission Rule 350-81-052(2).
